TIME TO REUSE

let's make it happen

It's time to adopt the Marin County Reusable Foodware Ordinance to reduce the amount of plastic in our environment.

Adopting the Ordinance

- by May 10, 2023, ensures a fee waiver for County enforcement in each town or city in Marin who adopts the Ordinance;
- makes it easier for businesses and public to follow the same requirements throughout the County; and
- helps keep our environment and the public safe from plastic pollution and micro-plastics that are considered toxic pollutants of emerging concern.

Let's get this done for our environment, our communities, and our children!

As a resident of

I am concerned about the harm single-use plastics pose to our community's health and well-being. The County of Marin has led the way by adopting a Reusable Foodware Ordinance in 2022. It's time for the cities to take the steps to adopt the same ordinance.

Asking businesses to switch to reusable foodware for dining-in and provide compostable takeout that can be processed in our Organic Compost Facility, is an important step in reducing the amount of toxic waste and micro-plastics making their way into the environment and our bodies.

Sincerely,
