## 2010 FAN Conference Fluoride Songs

### 1. Time it should go

(Tune: Home on the range)

Oh, fluoride should go  
From our diet we know  
From our water, our food and our salt  
We don't need it there  
For our health we do care  
So it's time that we call for a halt.

*Chorus:*

**Time, time it should go  
From our water, our food, and our  
salt  
We don't need it there  
For our health we do care  
So it's time that we call for a halt.**

You never would guess  
There could be such a mess  
In the safety of food that we eat  
The message we shout  
Is to "Take fluoride out"  
Then our mission, it will be complete.

### 2. Fluoride is not essential

(Tune: Hymn of the American Republic  
[John Brown's Body])

We need to take more fluoride like our  
need for mercury  
It's just the same as taking lead to try  
and be healthy  
Like extra radiation or a dose of arsenic  
Taking extra fluoride is the way to being  
sick.

*Chorus:*

**Fluoride is not essential  
Fluoride is not essential  
Fluoride is not essential  
It's something we can do without.**

Ask an alligator if it likes fluoride to  
drink  
Call its cousin caiman to see what it  
does think  
Check with the chinchillas and ring the  
rats as well  
I'm sure that if they had a choice one  
story they would tell.

Silicofluoride sickness: it affects fertility  
From problems with pregnancies there's  
no immunity  
For caimans and chinchillas and  
alligators too  
There's reproduction problems no matter  
what they do.

When sickness struck the quarter horses  
of Pagosa Springs  
Some vets were called, it baffled them,  
they thought of many things  
But then a vet who understood, he found  
why they were crook:  
Silicofluoride in the drinking water that  
they took.
