The following groups are eligible for the COVID-19 vaccine as of January 14, 2021:

- ✓ Paid or unpaid persons working or volunteering in a healthcare setting
- ✓ Residents of long-term care facilities and other congregate settings
- ✓ Frontline first responders
- ✓ Persons aged 65 and older
- ✓ Persons aged 16 to 64 years old who have at least one chronic medical condition that poses high-risk for severe COVID-19:
 - Cancer
 - Chronic Kidney Disease
 - Chronic Obstructive Pulmonary Disease (COPD)
 - Down Syndrome
 - Heart conditions (e.g. heart failure, coronary artery disease, cardiomyopathies)
 - Immunocompromised (weakened immune system) due to organ transplant (consult with your doctor)
 - Obesity (e.g. body mass index of 30kg/m² or higher)
 - Pregnancy (consult with your doctor)
 - Sickle cell disease
 - Smoking
 - Type 2 diabetes mellitus

These groups can start making vaccination appointments. More groups will become eligible in the coming weeks.

Where to find information on vaccination sites in New Jersey

CURRENT AS OF FEBRUARY 16

New Jersey Vaccine Scheduling System (NJVSS)

- ✓ Visit **covidvaccine.nj.gov** and fill out the registration form.
- ✓ You will receive a confirmation email.
- ✓ When eligible, you will receive a text and email to schedule an appointment, as availability opens up

covidvaccine.nj.gov

List of open vaccination sites on COVID information hub

- ✓ Visit **covid19.nj.gov/vaccine**
- ✓ Search for tab on 'Where and how to get vaccinated'
- ✓ Look up list of all open vaccination sites
- ✓ Directly schedule with site closest to you through individual scheduling links

covid19.nj.gov/vaccine

You can also call **855-568-0545** for support

Currently, consumer demand still exceeds the State's vaccine supply

Consumer demand

As of February 8th, over 2.5 million individuals have pre-registered in the State-run registration portal to receive vaccinations; **~1.7 million of those individuals are currently eligible**

Many additional individuals have pre-registered through other portals or have not yet pre-registered for or scheduled their appointments

Vaccine supply

To date, New Jersey has received approximately **1 million total first doses** from federal allocation

New Jersey expects to receive **~130 thousand first doses per week** going forward

New Jersey is actively working to schedule and administer vaccines to its currently eligible populations as it receives more supply from federal allocation

News

NJDOH Commissioner Joins Vaccine Equity Roundtable

NJDOH Commissioner Judith Persichilli, joined by N.J. Governor Murphy, held a virtual roundtable on Tuesday on vaccine safety and access in New Jersey's Black community.

Also participating: Lt. Governor Sheila Oliver; the Rev. Melvin E. Wilson; AFSCME International Vice President Debbie Parks; and Dr. David Kountz, Co-Chief Academic Officer and Vice President for Academic Diversity for Hackensack Meridian Health.

Q&A With Dr. Eddy Bresnitz

Dr. Eddy Bresnitz, NJDOH Medical Advisor and Professional Advisory Committee Chair, addressed topics such as vaccinations for children, equitable access and vaccine availability in NJ Spotlight News.

Last month, Dr. Bresnitz participated in an NJ Spotlight News virtual roundtable, and the questions were drawn from queries submitted by audience members before and during the online event. [Read more.](#)

FQHCs To Be Focus of Additional Vaccines

The Biden Administration [this week announced](#) the launch of a phased program to provide additional vaccines targeted directly to Federally Qualified Health Centers (FQHCs).

Although no New Jersey centers were selected for the first phase, we look forward to the state benefiting from this program as it progresses.

Partnership with CVS, Rite Aid Expands Vaccinations

A new federal pharmacy partnership with Rite Aid and CVS is bringing additional vaccines to New Jersey communities.

Under the partnership, both pharmacies have begun receiving direct shipments of over 27,000 vaccine doses available by appointment for those currently eligible in New Jersey at 102 stores.

CVS received 19,900 doses and Rite Aid 7,500 doses through a direct allocation from the federal government without tapping into the state's supply.

Visit [CVS.com](https://www.cvs.com) for location/appointment information; for Rite Aid, visit [riteaid.com/pharmacy/covid-qualifier](https://www.riteaid.com/pharmacy/covid-qualifier). The pharmacies join a statewide network of megastores and community-based vaccination sites.

As of Monday, the state has now administered over 1 million COVID vaccination doses. As of Friday, 1,244,224 total vaccinations have been administered, including 933,160 first doses. The state is also expecting increasing quantities in the weeks ahead of vaccines from the federal government for the six megastores and other vaccination centers.

Previously, NJDOH partnered with Rite Aid to provide COVID-19 vaccinations to home care and hospice staff. A current federal pharmacy partnership with CVS and Walgreens is vaccinating residents and staff of long-term care facilities.

If I get vaccinated, do I still need to wear a mask or face covering?

Yes, you will still need to wear a mask and follow all safeguarding methods until enough individuals are vaccinated to produce community protection. We know that the vaccine keeps you from getting sick, but we don't know yet if the vaccine prevents a person from contracting the virus and then spreading it.

[Sign up for Vax Matters](#)

What do we need from you?

Five messages to reinforce across communities

Continue practicing safeguarding measures – including social distancing, engaging with contact tracers, getting tested, and always wearing a mask – **even after getting vaccinated**

Support eligible organization members considering getting vaccinated at an open vaccination site (e.g., time off from work, paid sick leave, supporting with childcare)

Seek out and share educational materials, such as the vaccination information toolkit, with organization members on all channels (e.g., shared spaces, social media platforms, internal communications, and townhalls)

Provide relevant information to organization members on **where to get vaccinated if eligible, particularly those close to the workplace**

Role model safeguarding practices and vaccination (e.g. **share positive stories of experience** getting vaccinated if eligible) and use empathy-based language with organization members...

...and get vaccinated!
